1. A shopkeeper buys a book for ₹400 and sells for 480. Find the profit percentage.

$$\text{Profit} = 480 - 400 = 80$$

$$= \frac{\cancel{80}^{20}}{\cancel{400}} \times 1\cancel{00} \qquad = \frac{\text{Profit}}{\text{Cost Price}} \times 100$$

$$= 20\%$$

2. A man buys a watch for ₹1500 and sells it for ₹1200. Find the Loss percentage.

$$\text{Loss} = 1500 - 1200 = 300$$

$$= \frac{\overset{20}{\cancel{300}}}{\underset{2}{\cancel{15}}\cancel{00}} \times 1\cancel{00} \qquad \frac{\overset{20}{\cancel{300}}}{\underset{2}{\cancel{15}}\cancel{00}} \times 1\cancel{00}$$

$$\text{loss} = 20\%$$

3. A Trader marks a product 20% above the cost price and gives a 10% discount. Find the final profit percentage.

$$\text{Total percentage} = 100$$

$$= 100 + 20$$

$$= 120 - 10\%$$

$$= 108$$

Scanned with OKEN Scanner

$= 108 - 100 = 8\%$

$= \frac{8\%}{100} \times 100$

Profit $= 8\%$

4. If the cost of 5 pen is ₹100, what is the selling price of each pen to make 25% profit

$5 = 100$

1 pen $= \frac{100}{5} = 20\%$

$= 20 + 25\%$ of $20$

$\frac{20}{25} \times 100$

$= 20 + 5$

per pen $= 25$

5). A product is sold for ₹900 with a loss. Find the cost price.

$SP = 900$

Loss $= 10\%$

$100\% = 900$

Loss $= 100 - 10 = 90$

$SP = 900$

$900 = \frac{90}{100} \times x$

$900 \times \frac{10}{9} = 1000\%$

CP $= 1000$

BLOCK-2.

1. What technologies are influencing software development?

cloud computing and artificial intelligence

2. Why are scalable system important?

because it handle millions of user.

3. what does "Scalable" means in software system?

Scalable in software system is handle millions of users simultaneously

Grammar Correction.

1. He don't like programming

He doesn't like programming.

2. she have submitted the assignment.

she has submitted the assignment.

3. They was discussing the project.

They were discussing the project.
